PROYECTOS

Nexus App - Final DAM Project

E-commerce and sales platform (Web and Android) with scalable architecture.

- **Core Stack:** Spring Boot, Angular 21, Ionic, PostgreSQL, deployed on Docker (Render) and Vercel.
- **Key Features:** Payments integrated with Stripe (escrow), real-time chat (WebSocket STOMP) and geolocation-based search engine.
- **Security and AI:** Advanced authentication (2FA, JWT with global revocation) and AI-powered automated support.

Link: <https://github.com/SomosNexusApp>

MrRebujito - (Spring Boot + Angular + PostgreSQL)

Platform for the digitalization and smart management of local fairs and administrative procedures.

- **Core Stack:** Spring Boot (REST API), Angular and PostgreSQL database.
- **Key Features:** Centralizes official licenses, member management and product listings.
- **Value Added:** Streamlines communication between the town hall and stall owners with advanced security.

Link: <https://github.com/MrRebujito/>

AuraMovies - (SwiftUI + Vapor + MongoDB)

Social network and film tracker built for the Apple ecosystem.

- **Core Stack:** Native iOS frontend (SwiftUI), Swift backend (Vapor) and MongoDB database.
- **Key Features:** Tracking of watched films, ratings, social following system and integration with the TMDB API.
- **Security & Logic:** User authentication via JWT and account validation via email (SMTP).

Link: <https://github.com/Josemajr6/aura-movies>

RewindTV - (Flutter + Dart)

Cross-platform mobile app for managing personal entertainment libraries.

- **Core Stack:** Structured hybrid development using Flutter and Dart.

- **Key Features:** Systems for logging, categorizing, filtering and tracking activity (TV shows, films and video games).
- **Technical Approach:** Fluid, reactive interfaces built from a single codebase across multiple platforms

Link: <https://github.com/josemajr6/rewind-tv>

LePokedex - (Android Studio + Java)

Native mobile app focused on UI/UX for managing and displaying Pokémon data.

- **Core Stack:** Native Android development (Java) with XML-based interface design.
- **Key Features:** Efficient dynamic listings (via Adapters) and local data persistence.
- **Technical Approach:** Advanced activity lifecycle management, navigation between Activities and optimized rendering.
